

**SERVICE LETTER: # 3**

**DATE:** 07 February 2020

**SUBJECT:** PARACHUTE SYSTEMS

**INSPECTION:**

**REPLACEMENT:**

---

**COMPLIANCE PROCEDURE:**

Installation of parachute systems on Helisport Helicopters.

Helisport Helicopters does not believe that parachute safety systems are currently still effective, satisfactory operation has not been proven in all flight configurations that the helicopter is subjected to in its normal operations.

fake videos and photos are widespread on the web that do not demonstrate true system performance.

Helisport Helicopters:has not participated in programs for the development and testing of parachute systems on its helicopters, is not aware of any system that has never been used effectively, no documentation or installation manuals have been approved, and products for our helicopters.

Helisport Helicopters not approved any installation of the safety system on a parachute on its own aircraft. may cause an adverse effect, and put the pilot in a position to underestimate the importance of training in emergency procedures,

To all proprietary pilots and instructor operators with Helisport aircraft, he draws attention to the training of pilots during the basic courses and the mandatory safety requirements set out in section 7 of the pilot's manual.
